DUCA Raises Awareness for the Canadian Hemochromatosis Society

Most people are unaware that Hereditary Hemochromatosis (HHC) is the most common genetic disorder affecting Canadians. The Canadian Hemochromatosis Society was established to create awareness about this little-known, but common disorder.

Last month DUCA Financial Services Credit Union Ltd. was presented the Diamond Level Sponsorship Plaque for their generous corporate contribution to help raise awareness for Hemochromatosis in Canada. For further information, and to discover the symptoms of HHC, visit www.toomuchiron.ca
